

Portfolio

Task Requirements:

1. Navigation Bar (Navbar)

- A fully responsive navigation bar.
- Easy access to all sections of the portfolio from the navbar.

2. Designation and Introduction

- Display your professional designation (e.g., Frontend Developer, Web Developer, Full Stack Developer, etc.).
- Include a professional photo of yourself.

3. Resume Download Button

- A clearly visible button in the hero section that allows visitors to view and download your resume with a single click. (**Resume will be downloaded if your resume is ready. If it is not ready, for now, you can just keep the clickable button.**)

4. Social Links

- Embed buttons linking to your relevant social media profiles (e.g., GitHub, LinkedIn, Twitter, Facebook).

5. About Me Section

- Write a detailed introduction about yourself, including:
 - Your programming journey.
 - The type of work you enjoy.
 - Any hobbies or interests outside of programming (e.g., sports, painting).
 - Showcase your personality in this section.

6. Skills Section

- Display your skills in a visually appealing graphical format.
- Categorize skills if necessary (e.g., Frontend, Backend, Tools).

7. Educational Qualification

- Mention your educational background in detail if you have completed education above HSC.

8. Experience (If Applicable)

- Add relevant professional experience, if available.

9. Projects Section (At Least 3 Projects)

- Showcase at least three of your best projects in card format.
- Each project card must contain:
 - Project name
 - Project image
 - "View More / Details" button
- Clicking the "View More / Details" button should lead to a detailed project page containing:
 - Main technology stack used
 - Brief description
 - Live project link
 - GitHub repository link (only client)
 - Challenges faced while developing the project
 - Potential improvements and future plans for the project

10. Contact Information

- Provide an easy way for visitors to contact you directly.
- Include:
 - Email address
 - Phone number
 - WhatsApp number (optional)

11. Footer (Optional)

- A simple and elegant footer can be added for better presentation.

12. Responsive and Clean UI for All Devices

- Ensure full responsiveness across all screen sizes (desktop, laptop, tablet, mobile).
- Choose a polished and professional color scheme.

****You can use any technology to build the proper portfolio. But all the requirements must be completed.****

Submission Requirements:

- The website must be hosted, and a live link should be provided. Please ensure that the live link is working. Otherwise, you will be given 0.
- Ensure a clean and structured design following the above-mentioned points.
